Profile

To secure a Software Developer position in a dynamic and growth-oriented organization where I can apply my expertise in full-stack development, including modern frontend frameworks and robust backend technologies. I aim to contribute to the design and development of scalable, secure, and user-friendly applications. With a strong foundation in clean coding principles, version control, and agile methodologies, I am eager to collaborate with cross-functional teams, solve real-world challenges, and continuously enhance my technical and problem-solving abilities in a fast-paced, innovative environment.

.## Projects

- **Child Adult Care Management System**

The **Child & Adult Care Management System** is a comprehensive web-based application designed to streamline the administration and monitoring of care services provided to children and elderly individuals. The system facilitates efficient coordination between caregivers, healthcare professionals, families, and administrators to ensure consistent, personalized, and high-quality care.This platform allows for real-time scheduling, progress tracking, health monitoring, and communication, making it an essential tool for care centers, NGOs, or assisted living facilities.
